LEGAL STATUS

The laws of numerous states provide that Federal Land Bank bonds, both individual and consolidated issues, are legal for investment by savings banks and/or ıst funds. The states where specific statutes are provided governing such investnts are listed in the following tabulation:

labama
rkansas
alifornia
olorado
lorida
eorgia
daho
llinois
ndiana
owa
*Kansas
Kentucky
*Louisiana
*Maine
Maryland
*Massachusetts
†Michigan
Minnesota
*Mississippi
Missouri
*Montana
†Nebraska
New Hampshire
New Jersey
New York
North Carolina
Ohio
Oklahoma
Oregon
Pennsylvania
*Rhode Island
South Carolina
†Tennessee
Texas
*Utah
*Vermont
Virginia
Washington
†West Virginia
†Wisconsin
*Wyoming

Where no symbol appears, the state laws provide legality both for savings banks d trust funds. *Legal for savings banks. †Legal for trust funds.

TAX STATUS—Bonds of Federal Land Banks are exempt from Federal, state, municipal and local taxation. Exemption from surtaxes on income from bonds is included, but transfer o fbonds by inheritance, gift, etc., is subject to taxation under any applicable valid laws providing for taxation of transfers of personal property.

SECURITY—Consolidated Issues—Joint and several obligations of the 12 Federal Land Banks, both as to principal and interest. All bonds are secured by collateral consisting of at least an equal principal amount of U. S. Government obligations, and/or first mortgage loans on farm properties, made in amounts not exceeding 50% of value of mortgaged land and 20% of value of permanent, insured improvements thereon, as ascertained by Land Bank appraisers.

CAPITAL STOCK—Government owns about 38% of outstanding capital stock.

REDEEMABLE—On and after the first call date, as listed above, on any interest date on 15 days' notice, at par and accrued interest.

PRICE RANGE—The price ranges, as given above, represent the range of bid prices for the periods specified as available from our own files.

$36,000 of the above issue called at 100 on Feb. 1, 1943 at the Guaranty Trust C[illegible] New York City. Numbers as follows:

Coupon Bonds of $1,000 Each

M-232, 438, 616, 905, 1139, 1140, 1464, 1561, 1646, 1853, 1999, 2096, 2184, 23[illegible] 2456, 2529, 2658, 2970, 3156, 3429, 3670, 3813, 4010, 4081, 4278, 4388, 4530, 45[illegible] 4712, 4901, 5053, 5208, 5381, 5535, 5595.

Fully Registered Bond of $1,000

RM-7

(Reserved Coupon Bond No. M-1677)

Salmon River Power Co. 1st 5s due Aug. 1, 1952

$180,000 of the above issue called on Feb. 1, 1943. For complete details and inform[illegible] tion see the November 19 edition.

MARCH, 1943

Atlantic Sugar Refineries, Ltd. 4s due Nov. 1, 1951

$22,000 of the above issued called on March 1, 1943. For complete details a[illegible] information see January 8 edition.

Central Indiana Gas Co. Ref. & Impr. (Nov. 1st) A 5s due Sept. 1, 1957

Entire issue called at 103 on March 1, 1943 at City National Bank & Trust C[illegible] Chicago, Ill.

Cleveland Tractor Co. Conv. Deb. 5s due Nov. 1, 1945

Entire issue called March 15, 1943.

Gas Company of New Mexico 1st Extd. Conv. 6½s due Sept. 15, 1944

Entire issue called at 101 on March 15, 1943 at Northern Trust Co., Chicago, Illin[illegible]

Lebanon Gas & Fuel Co. (now Lebanon Valley Gas Co.) 1st 5s due March, 1, 1956

$100,000 of the above issue called at 105 on March 1, 1943 at the Guaranty Trust Co., New York City. Numbers as follows:

$1,000 Denomination

2, 9, 16, 18, 26, 29, 33, 37, 42, 47, 50, 54, 63, 67, 72, 77, 82, 83, 89, 95, 101, 105, 08, 115, 119, 120, 128, 137, 148, 153, 159, 162, 165, 171, 176, 182, 187, 191, 104, 209, 10, 212, 216, 219, 221, 226, 230, 232, 234, 238, 242, 245, 247, 252, 255, 260, 265, 270, 73, 278, 283, 285, 293, 299, 304, 309, 314, 319, 324, 330, 337, 338, 348, 355, 359, 364, 70, 375, 376, 382, 386, 395, 396, 402, 406, 412, 419, 421, 423, 435, 441, 442, 443, 452, 59, 460, 470, 478, 486.

APRIL, 1943

Cumberland County Power & Light Co. 1st 4s due Oct. 1, 1960

Entire issue called at 105 on pril 1, 1943 at Old Colony Trust Co., Boston, Mass.

Walworth Company Deb. As due April 1, 1955

Entire issue called at 100 on April 1, 1943 at The First National Bank, Boston, Mass.

MAY, 1943

Northern Electric Co. and Northern Paper Mills 1st Serial 5s due Nov. 1, 1946, Nov. 1, 1947 and May 1, 1948

Entire issue called at 102 for 1946 maturity, 102½ for 1947 and 1948 maturities on May 1, 1943 at Harris Trust & Savings Bank Chicago, Ill.

PREFERRED STOCK SECTION

Recent Changes in Quality Ratings Are Tabulated on Page 206.

EXPLANATIONS

The following instructions will be helpful for a complete interpretation of abbreviations and symbols.

Underwriter and Market

The key numbers appearing in the first column indicate the dealers that specialize in these securities. To interpret keys turn to the Directory of Dealers on Page 250.

Earnings Per Share in Dollars

Earnings are on a per share basis in dollars and cents. For example, 8.52 in the earnings column would mean $8.52 per share earned. The letter "d" preceding figures indicates deficit.

S & P Rating

For interpretation of S & P ratings turn to Page 3.

Div. Dates

In "dividend dates" column months ar designated by numerals. For example, 1/ would mean dividends payable January fir and quarterly thereafter. Where dividen is payable on a semi-annual basis th months are designated with letters.

Yield or Accum

In the column headed "yield or accum. the accumulations per share are indicate in dollars. For example, $45¼ in the yie column would mean accumulations of $45.2 per share.

CORPORATION & MUNICIPAL
BOND GUIDE

Including Preferred Stocks

FEBRUARY 5, 1943

Standard & Poor's Corporation Bond Guide has been designed to furnish in a convenient, compact manner the most essential information on a broad list of bonds and preferred stocks. Every effort has been made to supply the most significant data and to arrange it in the most usable form.

The volume is divided into five major divisions:

1. Explanatory Information—This section provides a detailed description of Standard & Poor's Quality Ratings, the Banking Regulations of 1938 and a complete explanation of the bond data presented.
2. Corporation Bond Section—This section constitutes the major portion of the volume and supplies detailed information on well over 4000 separate issues.
3. Supplemental Material—This includes Revised Ratings, Changes in Bank Status, Bond Yield Charts, Called Bonds, etc.
4. Preferred Stocks—This section presents statistical information on over 1200 Preferred Stocks.
5. Municipal Bond Section—This section gives information and quotations on over 5,000 municipal bond issues.

Utmost care is taken in compiling the information contained in this booklet, and while not guaranteed, it has been obtained from sources we believe to be accurate and reliable.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest paying bonds are graded into eight classifications ranging from A1+ for the highest quality designation through A1, A, B1+, B1, B, C1+ to C1 for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, D1 and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations, bonds assigned quality ratings equivalent to A1+, A1, A and B1+ generally are regarded as eligible for bank investment.

A1+ Bonds rated A1+ are the highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they may be expected to move with interest rates and hence are desirable investment media for institutions and individuals seeking maximum safety.

A1 Bonds rated A1 also qualify as high grade obligations, and in the majority of instances differ from A1+ issues only moderately in the various elements of safety. A-1-rated bonds, too, move with interest rates and hence are appropriate media where safety is a prerequisite.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not wholly free from possible adverse effects of changes in economic conditions. However, interest is regarded as secure and, by and large, principal appears relatively safe. They predominantly reflect money rates in their market behavior, but, to some extent also, business conditions.

B1+ The B1+, or medium grade, category is borderline between definitely sound obligations and those wherein the speculative element begins to predominate. These bonds have adequate asset protection and normally are covered by satisfactory earnings. Their susceptibility to changing conditions, particularly to lengthy depressions, necessitates constant watching. Marketwise, the bonds are as responsive to business conditions as they are to interest rates. The group is the lowest which qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the quality rating scale, beginning with B1, investment characteristics weaken and the speculative elements become progressively stronger. Bonds in this group do not qualify for investment by commercial banks.

B1 Bonds given a B1 rating are regarded as lower medium grade. They have some investment characteristics, though not enough to warrant an investment rating. In the case of utilities, interest is earned consistently but by narrow margins. In the case of other types of obligors, charges are earned on average by a fair margin, but in poor periods deficit operations are likely. These bonds fluctuate widely with business conditions.

B Bonds rated as low as B are speculative. Payment of principal and interest cannot be assured, though frequently bonds in this group continue paying interest even though it is earned only on a cash basis. The issues move primarily with the equity market.

C1+-C1 Bonds rated C1+ and C1 are outright speculations, with the lower rating denoting the more speculative. Interest is paid, although in the case of C1 ratings the bonds may be on an income basis and the payment may be small.

C This rating is reserved for income bonds on which no interest is being paid, and for the best defaulted issues.

D1-D All bonds rated D1 and D are in default, with the D symbol assigned to issues which appear to have little recoverable value.

DEFAULTED RAILROAD BONDS

The letter "r" preceding the quality rating on certain defaulted rail bonds reflects the treatment to be received in reorganization, being assigned only in cases where the existing issue will be undisturbed or will be given a single issue (or predominantly a single issue).

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other war uncertainties. For this reason, all ratings of Canadian issues are prefixed with superior letter C.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a star ★. The rating attempts to gauge the ability of the obligor to pay principal and interest, but because the obligor usually is a sovereign state, ordinary analytical methods do not apply.

STANDARD & POOR'S STOCK QUALITY RATINGS

A★★ Highest grade preferred stocks which have demonstrated their ability to pass successfully through prolonged periods of depression. Dividend records are long and unbroken, and the equity in assets is strong.

A★ High grade preferred stocks, with dividends earned by a wide margin even during periods of general business depression. Dividend records are long and favorable, and the equity in assets is large.

A Sound grade preferred stocks, with dividends earned by an adequate margin even in periods of general business depression. The dividend record is favorable, and the equity in assets is good.

B★★ Medium grade preferred stocks, with dividends earned by an adequate margin except in periods of severe depression. The dividend record is good, but not necessarily unbroken, and the equity in assets is ample. Such stocks are a "business risk," and their position is largely contingent upon earnings.

B★-B Speculative preferred stocks, generally in the dividend paying class. Payments either have a small margin of protection in earnings, or for some other reason their continuation is not assured.

C★★ Preferred stocks with erratic dividend records, and which can be expected to make payments only under favorable conditions.

C★ Non-dividend paying preferreds showing very small or no earnings available for dividends. Entirely speculative, but not without hope of improvement.

C Non-dividend paying preferreds which show no earnings available for dividends and without much prospect of any early payments.

D★★ Preferreds with little apparent equity and whose future is entirely contingent upon unforeseen developments.

D★ Showing default, receivership or similar unfavorable condition. Some equity, however, may be saved to stockholders through reorganization or other readjustment.

D Applied to preferreds which, owing to default or enforcement of prior liens, appear to be worthless, from a practical standpoint, although occasionally dealt in by speculators.

BANK INVESTMENT REGULATIONS

Effective July 1, 1938, the Comptroller of the Currency issued further regulations governing national bank purchases of investment securities, the substance of which were as follows:

"An obligation of indebtedness which may be purchased for its own account by a national bank or State member bank of the Federal Reserve System, in order to come within the classification of "investment securities" within the meaning of paragraph Seventh of Section 5136, must be a marketable obligation, i.e., it must be salable under ordinary circumstances with reasonable promptness at a fair value; and with respect to the particular security, there must be present one or more of the following characteristics:

(a) A public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue; or,

(b) Other existing securities of the obligor must have a public distribution as to protect or insure the marketability of the issue under consideration; or,

(c) In the case of investment securities for which a public distribution as set forth in (a) or (b) above can not be so provided, or so made, and which are issued by established commercial or industrial businesses or enterprises, that can demonstrate the ability to service such securities, the debt evidenced thereby must mature not later than ten years after the date of issuance of the security and must be of such sound value or so secured as reasonably to assure its payment; and such securities must, by their terms, provide for the amortization of the debt evidenced thereby so that at least 75% of the principal will be extinguished by the maturity date by substantial periodic payments: Provided, That no amortization need be required for the period of the first year after the date of issuance of such securities.

Where the security is issued under a trust agreement, the agreement must provide for a trustee independent of the obligor, and such trustee must be a bank or trust company.

The purchase of "investment securities" in which the investment characteristics are distinctly or predominantly speculative, or the purchase of securities which are in default, either as to principal or interest, is prohibited.

Purchase of securities convertible into stock at the option of the issuer is prohibited.

Purchase of securities convertible into stock at the option of the holder or with stock purchase warrants attached is prohibited if the price paid for such security is in excess of the investment value of the security itself, considered independently of the stock purchase warrants or conversion feature. If it is apparent that the price paid for an otherwise eligible security fairly reflects the investment value of the security itself and does not include any speculative value based upon the presence of a stock purchase warrant or conversion option, the purchase of a security is not prohibited."

On June 27, 1938, the Secretary of the Treasury, the Board of Governors of the Federal Reserve System, the Directors of the Federal Deposit Insurance Corporation, and the Comptroller of the Currency jointly issued a statement of agreement of revision of procedure in bank examinations, in which the section relating to the appraisal of bonds in bank examinations follows:

"Neither appreciation nor depreciation in Group I securities will be shown in the report. Neither will be taken into account in figuring net sound capital of the bank.

"Group I securities are marketable obligations in which the investment characteristics are not distinctly or predominantly speculative. This group includes general market obligations in the four highest grades, and unrated securities of equivalent value. (Standard & Poor's ratings for four highest grades are A1+, A1, A and B1+.)

"The securities in Group II will be valued at the average market price for 18 months just preceding examination and 50% of the net depreciation will be deducted in computing the net sound capital.

"Group II securities are those in which the investment characteristics are distinctly or predominantly speculative. This group includes general market obligations in grades below the four highest, and unrated securities of equivalent value.

"Present practice will be continued under which net depreciation in the securities in Group III and Group IV are classified as loss.

"Group III securities: Securities in default.

"Group IV securities: Stocks.

"Present practice will be continued under which premiums on securities purchased at a premium must be amortized.

"Present practice of listing all securities and showing their book value will be continued."

The Comptroller of the Currency in enforcing the investment securities regulation, issued June 27, 1938, and the Federal Deposit Insurance Corporation in its examination of banks have agreed to define the term "investment securities" to include only security obligations of banking quality.

With regard to securities rated by any one of the three rating services, the rule which has been agreed upon with respect to designation as to banking quality is that:

(a) A security rated by only one service will be designated as of banking quality if rated within the first four grades by that service;

(b) A security rated by only two services will be designated as of banking quality if rated within the first four grades by both services;

(c) A security rated by three services will be designated as of banking quality if rated within the first four grades by two of those services.

18-MONTH AVERAGE PRICES

The price is calculated by the National Quotation Bureau, Inc. New York according to a formula established by the bank amining agencies of the Government. It consists of the mid- nt between the highest quotation and the lowest quotation ilable in the Bureau's records during the preceding 18 months with a one-month lag—for all listed securities. On unlisted urities the same time period is covered but end-of-month quo- ions only are taken as a base for determining highest and west prices, from which the mid-point is figured. In both cases mid-point is figured to the nearest ½ point. Where no actual sales have taken place the bid price is the figure used.

In compiling these quotations the Bureau was not required to go beyond its own records on unlisted securities, and while every effort has been exerted to see that the figures are reported accurately, in accordance with the above formula, the Bureau cannot guarantee them. If any errors are found please report them so that corrections can be made.

Latest 18 Month Average Prices are as of December 30, 1942, and will apply in examination throughout the month of February.

HOW TO USE THE CORPORATION BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

•———— —Indicates issues listed on New York Stock Exchange.

◆———— —Indicates issues traded on New York Curb Market.

Name —This column gives the name of the different issues. In many cases, due to their length, names are abbreviated. For example, Pr.—Power, Lt.—Light, Wtr.—Water, Ry.—Railway, etc.

Desc. Rate and Due Date —This column describes the issue, giving the rate and due date. For example, 1st C.T. Cv. would mean First Collateral Trust Convertible, and Cv. Deb. would mean Convertible Debentures. In the case of preferred stocks Cu 6% 100 means dividends are cumulative and that this issue pays 6% annual dividends, with par 100. Cu. $5 means dividends are cumulative, that the issue pays $5 per share with no par.

Int. Dates —Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise specified such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.

Quality Rating —For complete explanation of Quality Ratings see page 2.

Eligible Inv. X—This symbol designates bonds rated the equivalent of Standard & Poor's A1+, A1, A or B1+ ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue. See Bank Investment Regulations, page 4.

sX—This symbol indicates "special privilege" bon They include "convertible" and "with warran issues. In our opinion they may be conside "eligible," provided the speculative value of th "special privilege" is not reflected in their curr market.

Y—This symbol indicates bonds which do not c form with the above rating classification. It our opinion that bonds carrying the (Y) sym are those which may be valued at the aver market price for 18 months just preceding exa ination. In such cases the 18 months average given. See Bank Investment Regulations page

Z—This symbol indicates bonds with a default sta

†Call Price —Unless otherwise indicated, bonds are callable any time. The following symbols are used to indic other provisions:

a—Callable only on interest dates.

b—A redemption provision exists or will exist pr to January 1, 1945, whereby the bonds may called at a price one point or less below stated price. This symbol is intended as a sig to indicate that the stated call price cannot used without qualification. It covers bonds which the regular call price declines a point less prior to January 1, 1945, bonds callable sinking fund at a lower price, and bonds c

able at a lower price in the event the obligor's properties are sold.

c—A redemption provision exists or will exist prior to January 1, 1945, whereby the bonds may be called at a price more than one point below the stated price. The same explanation as for (b) above, except for the greater change in price.

Abbreviations are used where bonds are not currently callable. For example, N.C. means Non-Callable; S.F. means callable only for sinking fund; 2'45 means non-callable at present but callable at 102 in 1945; ½-3 indicates the range of call prices on serial maturity bonds, the first figure (100½) being the present call price for the first maturity, and the last figure (103) being the call price for the last maturity.

Sale / Ask —Quotations on listed issues are obtained directly from the various Exchanges. Quotations on the unlisted issues are obtained from the dealers whose keys appear either as underwriter or specialist in the respective issue. For example, on New Haven Water Company bonds you will find keys indicating a specialized interest on the part of two dealers. Where several quotations are furnished on the same issue the highest bid and the lowest asked price are used. Quotations in the early month edition on listed issues are closing prices for the last day of the preceding month. The mid-month edition carries quotations on listed issues as of the close of the 14th day. The last sale is shown for listed issues. When no sale takes place between publication dates, bid and asked quotations are used.

Curr Yield —The yield is computed on the asked price. Where there is only a bid the yield is figured on the bid price. Serial maturities are figured on a current yield basis. In the column of current yield the abbreviation "Def." indicates that the bond is in default of its interest. Where the word "flat" is used it indicates that the bond is traded on a "without accrued interest" basis. The abbreviation indicated by 12/34, means December 1934 and subsequent interest not paid.

1942 High Low —This column gives the price range for the year 1942 to date.

1941 High Low —This column gives the price range for the year 1941.

1930 to 1941 High Low —This column gives the price range for the ten years to, but not including, 1941.

General Information —In this column you are supplied with information of a general nature pertaining to the respective security.

Cum. 1942 Sales —This figure can be computed only for listed bonds. For these issues, it represents the total of sales for the year through the end of the preceding month.

Tax —Numerals in this column indicate Federal Income Taxes paid at the source; 1—1% paid by the company, 2—2% paid by the company, 0—no tax paid by the company, "R"—Indicates tax paid by holder (up to 2%) is refunded by company.

Legal —Symbols in this column indicate representative states in which issues qualify as legal investments. For all states but Pennsylvania, any bond legal for savings banks is believed suitable for trust funds. For Pennsylvania, we designate as legal only those bonds which qualify under the more conservative trust fund law. In New Jersey, all bonds legal for savings banks are legal for trust funds, but numerous other issues also meet the requirements of the more liberal trust fund law; these are marked to designate this fact.

Out-stdg. —This column shows in terms of millions or fractions thereof, the amount of the respective securities now outstanding. For example, 12.1 would mean $12,100,000 outstanding.

Prior Liens —This column shows the amount of obligations which, in our opinion, rank prior to the issue under consideration.

Total Fund. Debt. —The total funded indebtedness of the company, corporation or system is shown in this column.

Interim Mos. '42-'41 —Interim times charges earned are shown for the number of months ending as indicated with a comparison for the preceding year. For example, 12 Se, would mean the twelve month period ending September.

Times Interest & Miscel. Charges Earned Annual —This column shows the number of times fixed charges were earned for the years 1942-1941-1940-1939-1938. Fixed charges include not only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization charges, discounts on securities sold, and any other similar charges. Coverage is computed after taxes.

Cash & Equiv. —In this column is totaled all items of a cash na

Curr. Assets Curr. Liab. Bal. Sheet Date —The current position of the respective compa shown in this column with the date following. example, 4.1-0.9-12/31/41 is interpreted $4,100,000 rent assets, $900,000 current liabilities, as of Dece 31, 1941.

Original Off. Pr. —This column gives the price at which the secu were originally offered and the date.

Underwriter and Market —This column gives you the advantage of kno the dealers who underwrote the respective issue well as those who have a special interest in t The underwriters are indicated in bold-faced while the interested dealers are shown in light-f type. To interpret the keys turn to the Directo Dealers on page 250. Issues traded on stock changes are so indicated together with registra status.

LEGAL STATUS

The laws of numerous states provide that Federal Land Bank bonds, both indi-ual and consolidated issues, are legal for investment by savings banks and/or st funds. The states where specific statutes are provided governing such invest-nts are listed in the following tabulation:

labama
rkansas
alifornia
olorado
lorida
eorgia
laho
linois
diana
wa
*Kansas
Kentucky
*Louisiana
*Maine
Maryland
*Massachusetts
†Michigan
Minnesota
*Mississippi
Missouri
*Montana
†Nebraska
New Hampshire
New Jersey
New York
North Carolina
Ohio
Oklahoma
Oregon
Pennsylvania
*Rhode Island
South Carolina
†Tennessee
Texas
*Utah
*Vermont
Virginia
Washington
†West Virginia
†Wisconsin
*Wyoming

Where no symbol appears, the state laws provide legality both for savings banks d trust funds. *Legal for savings banks. †Legal for trust funds.

TAX STATUS—Bonds of Federal Land Banks are exempt from Federal, state, municipal and local taxation. Exemption from surtaxes on income from bonds is included, but transfer o fbonds by inheritance, gift, etc., is subject to taxation under any applicable valid laws providing for taxation of transfers of personal property.

SECURITY—Consolidated Issues—Joint and several obligations of the 12 Federal Land Banks, both as to principal and interest. All bonds are secured by collateral consisting of at least an equal principal amount of U. S. Government obligations, and/or first mortgage loans on farm properties, made in amounts not exceeding 50% of value of mortgaged land and 20% of value of permanent insured improvements thereon, as ascertained by Land Bank appraisers.

CAPITAL STOCK—Government owns about 38% of outstanding capital stock.

REDEEMABLE—On and after the first call date, as listed above, on any interest date on 15 days' notice, at par and accrued interest.

PRICE RANGE—The price ranges, as given above, represent the range of bid prices for the periods specified as available from our own files.

Recent Changes in Quality Ratings Are Tabulated on Page 206.

EXPLANATIONS

The following instructions will be helpful for a complete interpretation of abbreviations and symbols.

Underwriter and Market

The key numbers appearing in the first column indicate the dealers that specialize in these securities. To interpret keys turn to the Directory of Dealers on Page 250.

Earnings Per Share in Dollars

Earnings are on a per share basis in dollars and cents. For example, 8.52 in the earnings column would mean $8.52 per share earned. The letter "d" preceding figures indicates deficit.

S & P Rating

For interpretation of S & P ratings turn to Page 3.

Div. Dates

In "dividend dates" column months a designated by numerals. For example, 1/ would mean dividends payable January fir and quarterly thereafter. Where divider is payable on a semi-annual basis th months are designated with letters.

Yield or Accum

In the column headed "yield or accum. the accumulations per share are indicate in dollars. For example, $45¼ in the yie column would mean accumulations of $45.2 per share.

MUNICIPAL BOND SECTION

EXPLANATIONS

The following instructions will be helpful for a complete interpretation of abbreviations and symbols.

Dealer Market

The key numbers appearing in the first column indicate the dealers that specialize in these securities. To interpret keys turn to the Directory of Dealers on Page 250.

Rate

Coupon rates are indicated in this column. The listing 2½s to 5s, 4½s to 6, etc., includes all coupons from 2½% to 5%, both inclusive, and from 4½% to 6%, both inclusive.

Curr. Market
1st Mat. — Last Mat.

Municipal securities, as a general rule, are quoted on a yield basis. Due to the fact that there is considerable variance in price between the first maturity and last maturity we have indicated the full range where possible. For example, under the State of California—Coupon 4½s due to '56 with quotations .30-2.10 would mean that the first maturity is quoted on a .30% basis while the 1956 maturity is quoted on a 2.10 basis. Where a single yield is shown it applies to the longer maturities. The letter "F" immediately after a quotation indicates that the bonds are selling on a "flat" basis meaning without accrued interest.

CORPORATION & MUNICIPAL BOND GUIDE

Including Preferred Stocks

FEBRUARY 18, 1943

Standard & Poor's Corporation Bond Guide has been designed to furnish in a convenient, compact manner the most essential information on a broad list of bonds and preferred stocks. Every effort has been made to supply the most significant data and to arrange it in the most usable form.

The volume is divided into five major divisions:

1. Explanatory Information—This section provides a detailed description of Standard & Poor's Quality Ratings, the Banking Regulations of 1938 and a complete explanation of the bond data presented.
2. Corporation Bond Section—This section constitutes the major portion of the volume and supplies detailed information on well over 4000 separate issues.
3. Supplemental Material—This includes Revised Ratings, Changes in Bank Status, Bond Yield Charts, Called Bonds, etc.
4. Preferred Stocks—This section presents statistical information on over 1200 Preferred Stocks.
5. Municipal Bond Section—This section appears in the 1st of the month edition only.

Utmost care is taken in compiling the information contained in this book, and while not guaranteed, it has been obtained from sources we believe to be accurate and reliable.

STANDARD & POOR'S BOND RATINGS

In the Standard & Poor's bond quality ratings system, interest paying bonds are graded into eight classifications ranging from A1+ for the highest quality designation through A1, A, B1+, B1, B, C1+ to C1 for the lowest. Bonds on which no interest is being paid, either because of default or because of "income" characteristics, are given C, D1 and D ratings. United States Government bonds are not rated, but are considered as a yardstick against which to measure all other issues.

BANK QUALITY BONDS

Under present commercial bank regulations, bonds assigned quality ratings equivalent to A1+, A1, A and B1+ generally are regarded as eligible for bank investment.

A1+ Bonds rated A1+ are the highest grade corporate obligations. They possess the ultimate degree of protection as to principal and interest. Marketwise, they may be expected to move with interest rates and hence are desirable investment media for institutions and individuals seeking maximum safety.

A1 Bonds rated A1 also qualify as high grade obligations, and in the majority of instances differ from A1+ issues only moderately in the various elements of safety. A-1-rated bonds, too, move with interest rates and hence are appropriate media where safety is a prerequisite.

A Bonds rated A are regarded as upper medium grade. They have considerable investment strength but are not wholly free from possible adverse effects of changes in economic conditions. However, interest is regarded as secure and, by and large, principal appears relatively safe. They predominantly reflect money rates in their market behavior, but, to some extent also, business conditions.

B1+ The B1+, or medium grade, category is borderline between definitely sound obligations and those wherein the speculative element begins to predominate. These bonds h adequate asset protection and normally are covered by satisf tory earnings. Their susceptibility to changing conditions, p ticularly to lengthy depressions, necessitates constant watchi Marketwise, the bonds are as responsive to business conditi as they are to interest rates. The group is the lowest wh qualifies for commercial bank investment.

SUB-STANDARD BONDS

As we move down the quality rating scale, beginning with investment characteristics weaken and the speculative eleme become progressively stronger. Bonds in this group do not qua for investment by commercial banks.

B1 Bonds given a B1 rating are regarded as lower medi grade. They have some investment characterist though not enough to warrant an investment rating. In the c of utilities, interest is earned consistently but by narrow marg In the case of other types of obligors, charges are earned average by a fair margin, but in poor periods deficit operati are likely. These bonds fluctuate widely with business conditi

B Bonds rated as low as B are speculative. Payment principal and interest cannot be assured, though quently bonds in this group continue paying interest even tho it is earned only on a cash basis. The issues move primarily v the equity market.

C1+-C1 Bonds rated C1+ and C1 are outright spec tions, with the lower rating denoting the n speculative. Interest is paid, although in the case of C1 rat the bonds may be on an income basis and the payment be small.

C This rating is reserved for income bonds on which interest is being paid, and for the best defaulted iss

D1-D All bonds rated D1 and D are in default, with the D symbol assigned to issues which appear to have little recoverable value.

DEFAULTED RAILROAD BONDS

The letter "r" preceding the quality rating on certain defaulted rail bonds reflects the treatment to be received in reorganization, being assigned only in cases where the existing issue will be undisturbed or will be given a single issue (or predominantly single issue).

CANADIAN BONDS

Canadian corporate bonds are rated on the same basis as American corporate issues. The ratings measure the intrinsic value of the bonds, but they do not take into account exchange and other war uncertainties. For this reason, all ratings of Canadian issues are prefixed with superior letter C.

FOREIGN BONDS

Foreign bonds carry the same rating symbols as domestic bonds, but in all cases they are preceded by a star ★. The rating attempts to gauge the ability of the obligor to pay principal and interest, but because the obligor usually is a sovereign state, ordinary analytical methods do not apply.

STANDARD & POOR'S STOCK QUALITY RATINGS

A★★ Highest grade preferred stocks which have demonstrated their ability to pass successfully through prolonged periods of depression. Dividend records are long and unbroken, and the equity in assets is strong.

A★ High grade preferred stocks, with dividends earned by a wide margin even during periods of general business depression. Dividend records are long and favorable, and the equity in assets is large.

A Sound grade preferred stocks, with dividends earned by an adequate margin even in periods of general business depression. The dividend record is favorable, and the equity in assets is good.

B★★ Medium grade preferred stocks, with dividends earned by an adequate margin except in periods of severe depression. The dividend record is good, but not necessarily unbroken, and the equity in assets is ample. Such stocks are a "business risk," and their position is largely contingent upon earnings.

B★-B Speculative preferred stocks, generally in the dividend paying class. Payments either have a small margin of protection in earnings, or for some other reason their continuation is not assured.

C★★ Preferred stocks with erratic dividend records, and which can be expected to make payments only under favorable conditions.

C★ Non-dividend paying preferreds showing very small or no earnings available for dividends. Entirely speculative, but not without hope of improvement.

C Non-dividend paying preferreds which show no earnings available for dividends and without much prospect of any early payments.

D★★ Preferreds with little apparent equity and whose future is entirely contingent upon unforeseen developments.

D★ Showing default, receivership or similar unfavorable condition. Some equity, however, may be saved to stockholders through reorganization or other readjustment.

D Applied to preferreds which, owing to default or enforcement of prior liens, appear to be worthless, from a practical standpoint, although occasionally dealt in by speculators.

BANK INVESTMENT REGULATIONS

Effective July 1, 1938, the Comptroller of the Currency issued further regulations governing national bank purchases of investment securities, the substance of which were as follows:

"An obligation of indebtedness which may be purchased for its own account by a national bank or State member bank of the Federal Reserve System, in order to come within the classification of "investment securities" within the meaning of paragraph Seventh of Section 5136, must be a marketable obligation, i.e., it must be salable under ordinary circumstances with reasonable promptness at a fair value; and with respect to the particular security, there must be present one or more of the following characteristics:

(a) A public distribution of the securities must have been provided for or made in a manner to protect or insure the marketability of the issue; or,

(b) Other existing securities of the obligor must have a public distribution as to protect or insure the marketability of the issue under consideration; or,

(c) In the case of investment securities for which a public distribution as set forth in (a) or (b) above can not be so provided, or so made, and which are issued by established commercial or industrial businesses or enterprises, that can demonstrate the ability to service such securities, the debt evidenced thereby must mature not later than ten years after the date of issuance of the security and must be of such sound value or so secured as reasonably to assure its payment; and such securities must, by their terms, provide for the amortization of the debt evidenced thereby so that at least 75% of the principal will be extinguished by the maturity date by substantial periodic payments: Provided, That no amortization need be required for the period of the first year after the date of issuance of such securities.

Where the security is issued under a trust agreement, the agreement must provide for a trustee independent of the obli and such trustee must be a bank or trust company.

The purchase of "investment securities" in which the investm characteristics are distinctly or predominantly speculative, or purchase of securities which are in default, either as to princ or interest, is prohibited.

Purchase of securities convertible into stock at the option of issuer is prohibited.

Purchase of securities convertible into stock at the option of holder or with stock purchase warrants attached is prohibite the price paid for such security is in excess of the investm value of the security itself, considered independently of the st purchase warrants or conversion feature. If it is apparent that price paid for an otherwise eligible security fairly reflects investment value of the security itself and does not include speculative value based upon the presence of a stock purch warrant or conversion option, the purchase of a security is prohibited."

On June 27, 1938, the Secretary of the Treasury, the Boar Governors of the Federal Reserve System, the Directors of Federal Deposit Insurance Corporation, and the Comptroller the Currency jointly issued a statement of agreement of revis of procedure in bank examinations, in which the section rela to the appraisal of bonds in bank examinations follows:

"Neither appreciation nor depreciation in Group I securi will be shown in the report. Neither will be taken account in figuring net sound capital of the bank.

"Group I securities are marketable obligations in which investment characteristics are not distinctly or predomina speculative. This group includes general market obligat in the four highest grades, and unrated securities of eq alent value. (Standard & Poor's ratings for four hig grades are A1+, A1, A and B1+.)

"The securities in Group II will be valued at the average market price for 18 months just preceding examination and 50% of the net depreciation will be deducted in computing the net sound capital.

"Group II securities are those in which the investment characteristics are distinctly or predominantly speculative. This group includes general market obligations in grades below the four highest, and unrated securities of equivalent value.

"Present practice will be continued under which net depreciation in the securities in Group III and Group IV are classified as loss.

"Group III securities: Securities in default.

"Group IV securities: Stocks.

"Present practice will be continued under which premiums on securities purchased at a premium must be amortized.

"Present practice of listing all securities and showing their book value will be continued."

The Comptroller of the Currency in enforcing the investment securities regulation, issued June 27, 1938, and the Federal Deposit Insurance Corporation in its examination of banks have agreed to define the term "investment securities" to include only security obligations of banking quality.

With regard to securities rated by any one of the three rating services, the rule which has been agreed upon with respect to designation as to banking quality is that:

(a) A security rated by only one service will be designated as of banking quality if rated within the first four grades by that service;

(b) A security rated by only two services will be designated as of banking quality if rated within the first four grades by both services;

(c) A security rated by three services will be designated as of banking quality if rated within the first four grades by two of those services.

18-MONTH AVERAGE PRICES

The price is calculated by the National Quotation Bureau, Inc. New York according to a formula established by the bank examining agencies of the Government. It consists of the mid-point between the highest quotation and the lowest quotation available in the Bureau's records during the preceding 18 months with a one-month lag—for all listed securities. On unlisted securities the same time period is covered but end-of-month quotations only are taken as a base for determining highest and lowest prices, from which the mid-point is figured. In both cases the mid-point is figured to the nearest ½ point. Where no actual sales have taken place the bid price is the figure used.

In compiling these quotations the Bureau was not required to go beyond its own records on unlisted securities, and while every effort has been exerted to see that the figures are reported accurately, in accordance with the above formula, the Bureau cannot guarantee them. If any errors are found please report them so that corrections can be made.

Latest 18 Month Average Prices are as of December 30, 1942, and will apply in examination throughout the month of February.

HOW TO USE THE CORPORATION BOND GUIDE

It is necessary to read carefully the following instructions in order to obtain the correct interpretation of the various abbreviations and data in the Guide.

•———— —Indicates issues listed on New York Stock Exchange.

◊———— —Indicates issues traded on New York Curb Market.

Name —This column gives the name of the different issues. In many cases, due to their length, names are abbreviated. For example, Pr.—Power, Lt.—Light, Wtr. —Water, Ry.—Railway, etc.

Desc. Rate and Due Date —This column describes the issue, giving the rate and due date. For example, 1st C.T. Cv. would mean First Collateral Trust Convertible, and Cv. Deb. would mean Convertible Debentures. In the case of preferred stocks Cu 6% 100 means dividends are cumulative and that this issue pays 6% annual dividends, with par 100. Cu. $5 means dividends are cumulative, that the issue pays $5 per share with no par.

Int. Dates —Interest dates are indicated by the first letter of the alternate six months on which coupons are payable. Unless otherwise specified such interest dates are always the first day of the month. The month of maturity is indicated by a capital letter.

Quality Rating —For complete explanation of Quality Ratings see page 2.

Eligible 18MoAv

X—This symbol designates bonds rated the equivalent of Standard & Poor's A1+, A1, A or B1+ ratings by a majority of the three recognized rating agencies which have assigned ratings to the issue. See Bank Investment Regulations, page 4.

sX—This symbol indicates "special privilege" bonds. They include "convertible" and "with warrants" issues. In our opinion they may be considered "eligible," provided the speculative value of the "special privilege" is not reflected in their current market.

Y—This symbol indicates bonds which do not conform with the above rating classification. It is our opinion that bonds carrying the (Y) symbol are those which may be valued at the average market price for 18 months just preceding examination. In such cases the 18 months average is given. See Bank Investment Regulations page 4.

Z—This symbol indicates bonds with a default status.

†Call Price —Unless otherwise indicated, bonds are callable at any time. The following symbols are used to indicate other provisions:

a—Callable only on interest dates.

b—A redemption provision exists or will exist prior to January 1, 1945, whereby the bonds may be called at a price one point or less below the stated price. This symbol is intended as a signal to indicate that the stated call price cannot be used without qualification. It covers bonds on which the regular call price declines a point or less prior to January 1, 1945, bonds callable for sinking fund at a lower price, and bonds call

able at a lower price in the event the obligor's properties are sold.

c—A redemption provision exists or will exist prior to January 1, 1945, whereby the bonds may be called at a price more than one point below the stated price. The same explanation as for (b) above, except for the greater change in price.

Abbreviations are used where bonds are not currently callable. For example, N.C. means Non-Callable; S.F. means callable only for sinking fund; 2'45 means non-callable at present but callable at 102 in 1945; ½-3 indicates the range of call prices on serial maturity bonds, the first figure (100½) being the present call price for the first maturity, and the last figure (103) being the call price for the last maturity.

Last Sale or Ask

—Quotations on listed issues are obtained directly from the various Exchanges. Quotations on the unlisted issues are obtained from the dealers whose keys appear either as underwriter or specialist in the respective issue. For example, on New Haven Water Company bonds you will find keys indicating a specialized interest on the part of two dealers. Where several quotations are furnished on the same issue the highest bid and the lowest asked price are used. Quotations in the early month edition on listed issues are closing prices for the last day of the preceding month. The mid-month edition carries quotations on listed issues as of the close of the 14th day. The last sale is shown for listed issues. When no sale takes place between publication dates, bid and asked quotations are used.

Curr Yield

—The yield is computed on the asked price. Where there is only a bid the yield is figured on the bid price. Serial maturities are figured on a current yield basis. In the column of current yield the abbreviation "Def." indicates that the bond is in default of its interest. Where the word "flat" is used it indicates that the bond is traded on a "without accrued interest" basis. The abbreviation indicated by 12/34, means December 1934 and subsequent interest not paid.

1942 High Low

—This column gives the price range for the year 1942 to date.

1941 High Low

—This column gives the price range for the year 1941.

1930 to 1941 High Low

—This column gives the price range for the ten years to, but not including, 1941.

General Information

—In this column you are supplied with information of a general nature pertaining to the respective security.

Cum. 1942 Sales

—This figure can be computed only for listed bonds. For these issues, it represents the total of sales for the year through the end of the preceding month.

Tax

—Numerals in this column indicate Federal Income Taxes paid at the source; 1—1% paid by the company, 2—2% paid by the company, 3—no tax paid by the company, "R"—Indicates tax paid by holder (up to 2%) is refunded by company.

Legal

—Symbols in this column indicate representative states in which issues qualify as legal investments. For all states but Pennsylvania, any bond legal for savings banks is believed suitable for trust funds. For Pennsylvania, we designate as legal only those bonds which qualify under the more conservative trust fund law. In New Jersey, all bonds legal for savings banks are legal for trust funds, but numerous other issues also meet the requirements of the more liberal trust fund law; these are marked to designate this fact.

Out-stdg. —This column shows in terms of millions or fractions thereof, the amount of the respective securities now outstanding. For example, 12.1 would mean $12,100,000 outstanding.

Prior Liens —This column shows the amount of obligations which, in our opinion, rank prior to the issue under consideration.

Total Fund. Debt. —The total funded indebtedness of the company, corporation or system is shown in this column.

Interim Mos. '42-'41 —Interim times charges earned are shown for the number of months ending as indicated with a comparison for the preceding year. For example, 12 Se, would mean the twelve month period ending September.

Times Interest & Miscel. Charges Earned Annual —This column shows the number of times fixed charges were earned for the years 1942-1941-1940-1939-1938. Fixed charges include not only interest on funded debt, but also interest on bank loans and other forms of floating debt, amortization charges, discounts on securities sold, and any other similar charges. Coverage is computed after taxes.

Cash & Equiv. -In this column is totaled all items of a cash nature

Curr. Assets Curr. Liab. Bal. Sheet Date —The current position of the respective company i shown in this column with the date following. Fo example, 4.1-0.9-12/31/41 is interpreted $4,100,000 cur rent assets, $900,000 current liabilities, as of Decembe 31, 1941.

Original Off. Pr. —This column gives the price at which the securitie were originally offered and the date.

Underwriter and Market —This column gives you the advantage of knowing the dealers who underwrote the respective issues, a well as those who have a special interest in them The underwriters are indicated in bold-faced type while the interested dealers are shown in light-face type. To interpret the keys turn to the Directory o Dealers on page 250. Issues traded on stock ex changes are so indicated together with registratio status.

LEGAL STATUS

The laws of numerous states provide that Federal Land Bank bonds, both individual and consolidated issues, are legal for investment by savings banks and/or rust funds. The states where specific statutes are provided governing such investments are listed in the following tabulation:

Alabama
Arkansas
California
Colorado
Florida
Georgia
Idaho
Illinois
Indiana
Iowa
*Kansas
Kentucky
*Louisiana
*Maine
Maryland
*Massachusetts
†Michigan
Minnesota
*Mississippi
Missouri
*Montana
†Nebraska
New Hampshire
New Jersey
New York
North Carolina
Ohio
Oklahoma
Oregon
Pennsylvania
*Rhode Island
South Carolina
†Tennessee
Texas
*Utah
*Vermont
Virginia
Washington
†West Virginia
†Wisconsin
*Wyoming

Where no symbol appears, the state laws provide legality both for savings banks nd trust funds. *Legal for savings banks. †Legal for trust funds.

TAX STATUS—Bonds of Federal Land Banks are exempt from Federal, state, municipal and local taxation. Exemption from surtaxes on income from bonds is included, but transfer o fbonds by inheritance, gift, etc., is subject to taxation under any applicable valid laws providing for taxation of transfers ot personal property.

SECURITY—Consolidated Issues—Joint and several obligations of the 12 Federal Land Banks, both as to principal and interest. All bonds are secured by collateral consisting of at least an equal principal amount of U. S. Government obligations, and/or first mortgage loans on farm properties, made in amounts not exceeding 50% of value of mortgaged land and 20% of value of permanent. insured improvements thereon, as ascertained by Land Bank appraisers.

CAPITAL STOCK—Government owns about 38% of outstanding capital stock.

REDEEMABLE—On and after the first call date, as listed above, on any interest date on 15 days' notice, at par and accrued interest.

PRICE RANGE—The price ranges, as given above, represent the range of bid prices for the periods specified as available from our own files.

MARKETS: •New York Stock Exchange. **REDEEMABLE PRICES:** #On this or any subsequent interest date, at par, on 4 months' notice. †On this or any subsequent interest date, at par, on 30 days' notice. ‡On this or any subsequent interest date, at par, on 2 months' notice. §On this or any subsequent interest date, at par, in such manner as may be prescribed by the Board of Directors.

TAX AND LEGAL STATUS: (a)Legal for savings banks in all states. Exempt, both principal and interest, from taxation except (1) estate, inheritance and gift taxes, and (2) surtaxes, excess-profits taxes and war-profits taxes. If principal does not exceed $5,000, the holder is exempt from clause (2) of these provisions. (b)Legal for savings banks in all states. Exempt, both principal and interest, from all taxation, except estate, inheritance and gift taxes. (c)Legal for savings banks in all states. Exempt, both principal and interest from normal income tax, but not exempt from surtaxes, estate, inheritance and gift taxes. (d)Legal for savings banks in all states. Subject to Federal taxation; exempt under present laws from state and local taxation. PRICES: b Bid. YIELD AFTER CORPORATE TAXES—Net return after application to the yield of the 16% surtax applicable to partially tax exempt issues and 40% tax applicable to fully taxable issues. Fully taxable issues. ▲ Ineligible for investment by commercial banks until May 5, 1952., for the 2½s, 1962-67 and until December 1. 1952 for the 2½s. 1963-68.

Standard & Poor's Corporate Bond Yield Indexes—By Ratings

Issues represent average yields for median issues as follows: Utilities, four issues out of list of 10 for each quality group; Railroads, the same; Industrials, three out of list of five. Composite yields are weighted average of sub-groups: Utilities, 2; Railroads, 2; Industrials, 1.

PREFERRED STOCK SECTION

Recent Changes in Quality Ratings Are Tabulated on Page 206.

EXPLANATIONS

The following instructions will be helpful for a complete interpretation of abbreviations and symbols.

Underwriter and Market

The key numbers appearing in the first column indicate the dealers that specialize in these securities. To interpret keys turn to the Directory of Dealers on Page 250.

Earnings Per Share in Dollars

Earnings are on a per share basis in dollars and cents. For example, 8.52 in the earnings column would mean $8.52 per share earned. The letter "d" preceding figures indicates deficit.

S & P Rating

For interpretation of S & P ratings turn to Page 3.

Div. Dates

In "dividend dates" column months are designated by numerals. For example, 1/1 would mean dividends payable January first and quarterly thereafter. Where dividend is payable on a semi-annual basis the months are designated with letters.

Yield or Accum

In the column headed "yield or accum." the accumulations per share are indicated in dollars. For example, $45¼ in the yield column would mean accumulations of $45.25 per share.
